

## **Design, Develop, Produce,Supply**

### **Who we are ?**

Our company has been producing electronic cards and projects since 2017 with 20 years of experience. We have been producing of all kinds of electronic cards, SMD and T.H strings in accordance with IPC-A-610 standards, at our new electronic card production line since 2020.

In addition to electronic board production, we also provide support and services in electronic component supply, laser marking, conformal coating, 3D Print output, PCB drawing, microprocessor software, high-end software, R&D.

Ecoradco is a rising brand in the World market especially in European market with its high quality production and customer satisfaction principles. Working with a focus on quality and customer satisfaction, Ecoradco has registered its competence with ISO 9001 quality certificate .

### **Electronic Card Production ;**

As Ecoradco, our priority has always been to produce. We have served many sectors with millions of electronic cards and devices we have produced so far. Today, we continue to produce Turkey's electronic requirements with the technical capability and capacity. We carry out all our productions in accordance with IPC Standards, with our teammates who receive regular training from our Certified IPC Trainer (CIT) in accordance with 4 different standards, at ESD and MSD controlled areas.

We perform electronic card and device assembly, boxing, packaging and shipping processes for many different sectors, with high quality and with affordable cost. Thus, we can make fast deliveries in line with customer expectations.

By planning our SMD lines according to the different needs of our customers, we offer our customers of many different sectors simultaneous and high-quality services from low-volume prototype production to very high-volume mass productions or to Advanced technology / Defense Industry productions with very intense types and features. As Ecoradco, we produce fast and economical solutions for all your design requests by the help of our 20 years of experience in design and production.

### **Our Sustainability Approach ;**

As Ecoradco; our sustainability policy is;  
To ensure the continuity of our activities by aiming to meet economic, environmental and social needs without harming the living conditions of future generations.

This approach obliges us to structure our organization to focus on environmental and social sustainability in a way that includes all our activities and guides us to integrate and improve sustainability awareness into our business processes.

Considering the increasing importance of the concept of sustainability for all humanity and with the responsibility of providing a critical service to many sectors, we are determined to work more and more on this issue and to convey this awareness to all our employees and stakeholders.

### **Our Quality Policy ;**

As Ecoradco, we offer reliable, flexible, cost-effective, short lead-time design, supply and production solutions using the most advanced technologies in line with the vision we have set. For this purpose;

- We strive to submit the highly beneficial services to our customers as the best solution partner and to maintain customer satisfaction.
- We document our quality management system "TO MEET THE REQUIREMENTS OF .ISO 9001. STANDARD".
- Based on total quality targets, we work to achieve company and unit targets in a team spirit.
- In line with the continuous improvement approach, we work to increase the efficiency of all our processes to a level that can compete internationally.
- Based on continuous improvement, we target zero defect.
- We provide the best working environment for our employees, support innovative and creative approaches, and increase the technical and behavioral competencies of our employees.
- We provide and maintain trust-based cooperation with our suppliers and subcontractors in mutually beneficial relationships.

## **Our Information Security Policy ;**

Customer property and information are one of the most valuable assets for Ecoradco. We are aware that information security is the responsibility of all our employees and that both our company and our customers may suffer significant damages in case of voluntary or involuntary loss or improper use of information. With this awareness, we protect the confidentiality, integrity and accessibility of the information of our company and our stakeholders with a sustainable understanding.

In line with this understanding;

We carry out the necessary studies and take technical measures for the establishment of the Information Security Management System

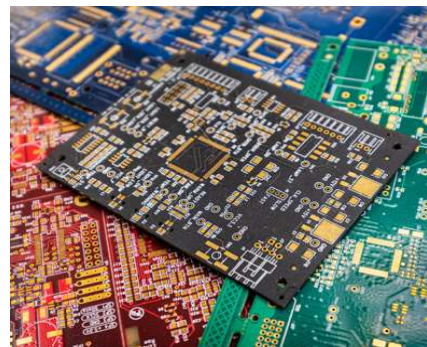

We define and classify our information assets, determine the risks that threaten them, develop the necessary methods to manage these risks and apply them effectively. We follow the relevant legislation and developments in the legislation, and take the necessary measures to ensure its implementation and prevent possible violations.

With the fact that the most important factor in ensuring information security is human, we organize trainings that will increase the awareness of our employees and other stakeholders when necessary, and follow up the results. We prepare business continuity plans and take necessary precautions in order not to interrupt our business and our responsibilities towards our customers in the face of any adverse event. We do the necessary work to help establish our Information Security Management System in accordance with the standards.

## **PCB Production ;**

We offer professional and fast solutions for your PCB needs at the most affordable cost. You can contact us so that we can provide the best prices also in PCB

production with our flexible structure that can meet all kinds of needs and comply with customer expectations.

We examine your data and direct you according to your needs. All your PCBs are 100% tested and submitted to you in the best quality. If requested, all kinds of reporting can be done.

## **Our Mission ;**

To be one of the world's leading manufacturers and suppliers in the field of electronic card production. We are trying to develop the world's most creative, innovative, economical and user-friendly heating control elements and related products under Ecoradco brand.

## **Infrastructure ;**

Ecoradco is constantly updating itself with its modern infrastructure, using the latest technology and developments in the sector, and taking into account the expected developments for the future in an accurate, fast and reliable way.

## **Our Services ;**

- *SMD Typesetting*
- *Manual Typesetting*
- *R&D Service*
- *PCB Design / Production*
- *Software*
- *Mechanical Assembly / Boxing*
- *Material Supply*
- *Cable length cutting, end opening, crimping*

## **Some Sectors We Serve ;**

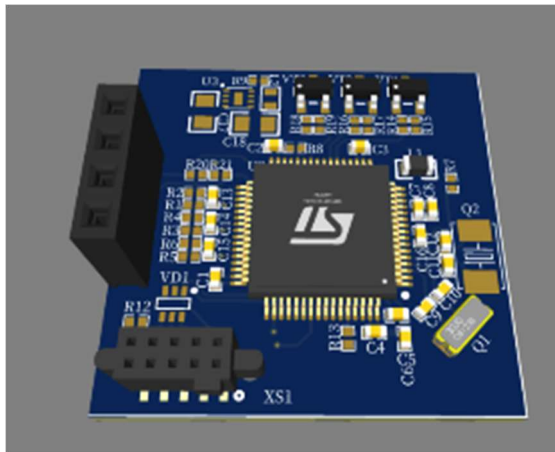

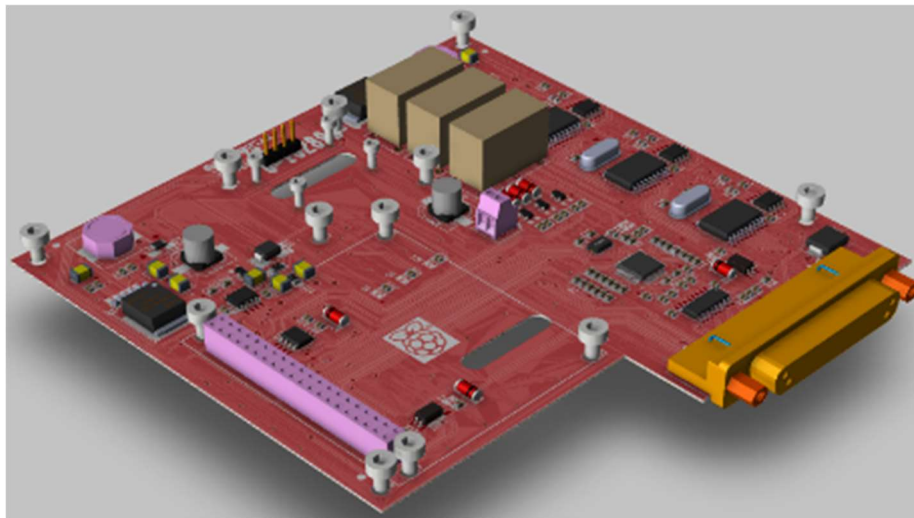

- *Automotive industry*
- *White Goods / home appliance*
- *Defense industry*
- *Medical Devices Manufacturers*
- *Home Automation Systems*
- *Industrial Electronics Production*
- *Heating Cooling*
- *Communication*
- *Lighting and LED Technologies*

## Current Market & Customers worldwide ;

- UK
- Spain
- France
- Italy
- Poland
- Ukraine
- Ireland
- Germany
- Portugal
- Bulgaria
- Moldova
- Georgia...
