

Basic Heating Element

BASIC HEATING ELEMENT FOR ELECTRIC TOWEL RAIL

The Basic Heating Element is a water heating resistor designed for towel rails. It is easy to use and does not include any electronic control circuits.

To operate, simply plug it into a power outlet. Unplug it to turn it off.

Available in a wide range of power options, from 100W to 1000W, to meet your specific heating requirements.

Constructed with durable materials for long-lasting performance, the heating element is designed to distribute heat evenly across the towel rail.
