

**First Step to a Green
Future Leave a Mark on
the Environment!**

Introduction

- Hello, today I will share with you Ecoradco Electronics' sustainability policy and our commitment to the environment.
- As a company, I will show you how we are taking steps towards a sustainable future and how we are making a difference in protecting our environment.

Our Sustainability Vision

- As Ecoradco Electronics, we are committed to a sustainable future.
- With the title 'First Step to a Green Future - Leave a Mark on the Environment!', we are introducing our sustainability policy.
- Our vision is to reduce our environmental impact, use resources efficiently, and leave a cleaner world.

Our Environmental Principles

- Our 'First Step to a Green Future - Leave a Mark on the Environment!' policy is based on our environmental responsibilities.
- We minimize our environmental impact through practices such as energy and water conservation, waste management, and recycling.
- We adopt environmentally friendly production processes in our organization and prioritize the conservation of natural resources.

Product Management

- We manage the life cycle of our products in line with our sustainability goals.
- We constantly strive to increase energy efficiency, prefer recyclable materials, and reduce environmental impacts.
- By providing information to our customers about product usage, recycling, and disposal, we encourage them to make environmentally friendly choices.

Supply Chain and Business Partners

- To achieve our sustainability goals, we collaborate with our business partners in our supply chain.
- We request environmental compliance, quality, and sustainability standards from our suppliers.
- We encourage them to join the "Leave a Trace on the Environment!" movement and maintain regular communication with our business partners to share environmentally friendly practices.

Social Contribution

- Our sustainability policy aims to add value to society.
- We strive to raise environmental awareness through various activities such as educational programs, social responsibility projects, and support for local communities.

Thanks

- Thank you for your interest and time.
- With our policy 'Green Future - Leave a Trace on the Environment!' we will continue working towards sustainability.
- Let's move together for a cleaner and greener world!
